

COPYSEC copies the security settings from a set of source files to a set of target files.

Command syntax is:

CopySec <from>[,]<to>

The following wild cards are supported:

From	To
\$vol.subvol.file	\$vol.subvol.file
\$vol.subvol.file	\$vol.subvol.*
\$vol.subvol.fil*	\$vol.subvol.*
\$vol.subvol.*	\$vol.subvol.*
\$vol.*.file	\$vol.*.file
\$vol.*.file	\$vol.*.*
\$vol.*.fil*	\$vol.*.*
\$vol.*.*	\$vol.*.*

It copies ALL security attributes, as long as the user is allowed to SET these attributes.

e.g. SUPER.SUPER is required to copy the LICENSE attribute!
