

MyUser - a free ware tool from GreenHouse

=====

MyUser 111

-----

25Oct2004

Wouldn't it be nice to have all GUARDIAN users displayed along with the mapped Alias users, and the default security attributes?

Here it is: MyUser satisfies this wish.

Command syntax:

-----

[run] MyUser [/OUT <file>/] [-H[ELP]]|[<user> [BY ID|NAME]]

where

<file>           OUT file MyUser sends its output to.  
In case <file> does not exists, it becomes created as  
an EDIT type file.

-H[ELP]           keyword, directing MyUser to display some help  
information.

<user>           is one of:  
xxx,yyy           = complete GUARDIAN ID  
xxx,\*             = GUARDIAN group, by group number  
a.b               = GUARDIAN name  
a.\*               = GUARDIAN group, by group name  
Alias             = Alias Name  
\*, or \*.\* or \*,\* = ALL users  
when missing, the actual users is assumed

BY ID|NAME       optional sorting modifier:  
Sorts the output by the users name.  
Valid only for:  
xxx,\*             = GUARDIAN group, by group number  
a.\*               = GUARDIAN group, by group name  
\*, or \*.\* or \*,\* = ALL users

Restrictions:

-----

When MyUser has to sort the found users by their name (BY NAME command extension), a maximum of 32767 users is taken into account.

Examples:

-----

Empty user parameter:

```
$GHS1 MYUSER 156>myuser
MyUser (110) - T7172 - (20Aug2004) System \BEECH, running NSK G06
Copyright (c) GreenHouse Software & Consulting 2000
```

ID	Name	Security	Defaults
100,005	SA.CARL	UUOO	\$GHS1.SECOM
	Carlito	UUOO*	\$GHS1.SECOM
	Weber_Carl	O000	\$SYSTEM.NOSUBVOL

```
$GHS1 MYUSER 157>
```

Fully blown GUARDIAN name:

```
$GHS1 MYUSER 157> myuser sa.carl
MyUser (110) - T7172 - (20Aug2004) System \BEECH, running NSK G06
Copyright (c) GreenHouse Software & Consulting 2000
```

ID	Name	Security	Defaults
100,005	SA.CARL	UUOO	\$GHS1.SECOM
	Carlito	UUOO*	\$GHS1.SECOM
	Weber_Carl	O000	\$SYSTEM.NOSUBVOL

```
$GHS1 MYUSER 158>
```

Supplied GUARDIAN group name:

```
$GHS1 MYUSER 158> myuser ghs.*
MyUser (110) - T7172 - (20Aug2004) System \BEECH, running NSK G06
Copyright (c) GreenHouse Software & Consulting 2000
```

ID	Name	Security	Defaults
200,001	GHS.COMFORTE	O000	\$GHS2.COMFORTE
200,002	GHS.CARL	UUOO	\$GHS1.SECOM
200,004	GHS.MARTIN	O000	\$GHS2.MARTIN
200,005	GHS.GERHARD	O000	\$GHS2.SEGJ
	Gerhard	O000	\$GHS2.SEGJ
	Jelinek	O000	\$GHS2.SEGJ
200,006	GHS.CHRISTI	UUOO	\$GHS2.CHRISTI
	Christian	O000	\$GHS2.CHRISTI
200,255	GHS.MANAGER	O000	\$GHS2.CARL

```
$GHS1 MYUSER 159>
```

Supplied Alias name:

```
$GHS1 MYUSER 159> myuser Gerhard
MyUser (110) - T7172 - (20Aug2004) System \BEECH, running NSK G06
Copyright (c) GreenHouse Software & Consulting 2000
```

ID	Name	Security	Defaults
200,005	GHS.GERHARD	O000	\$GHS2.SEGJ
	Gerhard	O000	\$GHS2.SEGJ
	Jelinek	O000	\$GHS2.SEGJ

```
$GHS1 MYUSER 160>
```

Installation:

-----

MyUser does not need to become installed: It can be run from any location.

Security Settings:

-----

MyUser needs to be licensed.  
The GUARDIAN Security should be set to: "OONO"  
The owner can be anybody, but SUPER.SUPER is preferred.

History:

-----

Version 100, 27Dec2000: 1st release  
... and bug free as far as I can see...

Version 102, 12Mar2001: 3rd release  
Help text corrected.

Version 110, 20Aug2004: 4th release  
In case a user has a default ACL defined, an asterisk is printed on the right side of the users GUARDIAN default security setting.

Version 111, 25Oct2004: 5th release  
In case a user (GUARDIAN or Alias) has an initial OSS directory, its last 26 bytes are displayed.  
The number of users to be processes by MyUser is enhanced to 100,000.

In case you

- like the tool, or
- find a bug or glitch, or
- have a request for enhancement:

Please let me know!
